I tried to create one with Rufus but it seems that it does not support all devices and does not really understand the file structure. So, the question is: Is there any other tool that supports creating a USB installer for a big game, or a tool that understands the common structure of Windows programs? A: Yes, the easiest tool to create a standard image of a USB stick is PowerShell. First, make sure you are on the correct version of Windows by going to windows.com/ After that you can start PowerShell with Administrator Rights by running the Start

# Menu search program start-powershell. Then you need to first check if it can use the 3e33713323
